Full-stack Software Developer Intern – Future Interns India.

November 2024 – Present **Remote**

- Learnt about boosting social Media profiles.
- Worked on some Web Development projects like es-shop (a shoes ecommerce website), To-do list website, and portfolio websites.

Technical Skills

The following are some of my technical skills, along with other tools and abilities that support my career and enhance my productivity.

- **Programming Languages:** JavaScript, PHP, Python
- **Frameworks & Libraries:** React, Laravel, Bootstrap
- **Database Systems:** MySQL, MS Access
- **Other skills:** Git, GitHub, Vite, APIs, Photoshop, Figma, MS Office Suite, Logo and banner Designs.

Projects

These are some of my projects since 2023.

Airbnb crone – A travels and stays booking system.

Tools/Technologies: Laravel, Bootstrap, MYSQL, GIT

This project was inspired by my supervisor at **SpiderBit Ltd** where I was a **software developer intern**. He gave me this project in aim of testing my full-stack development skills and it took only three to four weeks to be completed.

It includes various places like cabin, guesthouses, hotels, boats, containers, Apartments, earth homes, etc. As it is a crone of real Airbnb Booking site.
